

- Conteo automático de pasajeros. Imagen 3D

Marca **Streamax**
Reference: **PAS-CON-P2**

Descripcion

Ref: PAS-CON-P2.

Streamax Passenger counter P2 is a professional Automatic Passenger Counter which adopts 3D imaging techniques. It can be applied to vehicles like shuttle buses, tourism buses, etc. Its accuracy is as high as 99% during normal time, and over 95% in peak period as well. Owing to its advanced technology and special design, it can adapt to different light and weather conditions, as well as accurately detect the entry or exit direction of passengers. Besides, user can connect the network or RS485 port to the mobile DVR, and transmit the passenger data to platform to have analysis management of passenger data.

Características técnicas

1. Can be applied to different weather conditions.

Adopts with the latest 3D imaging techniques.

Not be interfered by light or shadow. It shares the same high accuracy with patented image recognition algorithm during daytime and night.

2. High accuracy.

Accuracy is over 99% in normal time;

Accuracy is over 95% in peak period;

In general, the overall accuracy is over 97%.

3. Easy to maintain.

Supports remote upgrade, algorithm will be optimized from time to time.

The system parameters can be imported or exported.

Auto upload fault.

Remote upload by Streamax Easycheck.

Specifications

Average accuracy: 97% above

Image sensor: 3D Imaging CMOS

Total weight: 400g

Operation voltage: 8~36V

Average power: 7.5W

Operation temperature: -25C° ~ +70C°

Storage temperature: -40C° ~ +85C°

Humidity: 0% ~ 95% (No condensation)

Dust proof and water proof grade: IP43

Dimension: 156.4*81.4*36.1mm
